

DUNN - ECOLOGY

Many students are working from home making the best of a bad situation. I want to thank all of you for doing your best while working from home. This week we will continue to talk about previous content.

Monday - Wednesday

You will work for 20 minutes a day on the topic of SECONDARY SUCCESSION

Thursday - Friday

You will work for 20 minutes a day on the topic of PRIMARY SUCCESSION

Take charge and design this assignment however you see fit. You can discuss natural examples like forest fires and floods or do man made situations like an old house or parking lot. I realize some people have things at home that others don't. This can be a poster with each topic on a side, it could be a report you type, it could be a comic book like page. Write a song, a poem or anything you think of to express your knowledge of the topics. It doesn't have to be "done" either. Your comic can just stop after 20 minutes on the last day. The song doesn't have to be complete and so on... Just work on the two topics for 20 minutes a day and submit it Friday.

Please send your work as ONE EMAIL titled WEEK 6 ECOLOGY. Be creative and express yourself through the work.
